

Korean Pangenome Reference (KPR) Data Access Policy

Data Access Committee

Name: KRIBB Genomic Medicine Research Center Data Access Committee

EGA accession: EGAC50000001142

Institution: Genomic Medicine Research Center, Korea Research Institute of Bioscience and Biotechnology (KRIBB), 125 Gwahak-ro, Yuseong-gu, Daejeon 34141, Republic of Korea

Contact: Jae-Yoon Kim (jaeyoonkim@kribb.re.kr)

Policy

The KRIBB Genomic Medicine Research Center Data Access Committee (DAC) oversees access to and use of the genomic data generated for the Korean Pangenome Reference (KPR). These data comprise long-read whole-genome sequencing on the PacBio Revio and Oxford Nanopore PromethION platforms, together with Hi-C data, from 19 Korean individuals.

Access is restricted to researchers conducting non-commercial, academic studies in health-related, biomedical or population-genomic research, including the development and benchmarking of analytical methods, consistent with the informed consent given by the research participants and with the approvals of the Institutional Review Boards of Chungnam National University Hospital (CNUH 2019-06-034) and Chungbuk National University Hospital (KRIBB P01-202503-02-002; CBNUH 2025-07-011).

Applicants must submit a detailed research proposal, institutional ethics approval (IRB), and evidence of relevant expertise, and the applicant's institution must sign the Data Access Agreement before access is granted.

All data accessed under this policy must be stored in secure environments, must not be shared with unauthorized third parties, and must not be used to identify individual research participants or their relatives, nor for forensic, law-enforcement, insurance, employment or marketing purposes. The data are provided strictly for the approved research project; any further use requires additional DAC approval.

A publication moratorium applies: submission for publication should not occur until 12 months after these data were first made available, unless KRIBB has provided written consent to earlier submission. Results derived from these data must acknowledge the source study and cite the EGA study and dataset accession numbers.

For inquiries or to request access, contact Jae-Yoon Kim (jaeyoonkim@kribb.re.kr).

Data Use Ontology (DUO) codes

DUO:0000042 general research use (GRU)

DUO:0000018 not for profit, non commercial use only (NPUNCU)

DUO:0000021 ethics approval required (IRB)

DUO:0000027 project specific restriction (PS)

DUO:0000024 publication moratorium (MOR)
